Ms. Charisse E. Jeffries
President, Mau Alpha Tau
Dept. of Mathematics &
Computer Science
114/116 Key Hall
Morgan State University
Baltimore, MD 21239

Dear Ms. Jeffries:

Please accept my apology for our Agency's failure to respond earlier to your letter of 1 October. It was referred to this office by another of our components only last week. We would be glad to host a visit by a group from your university in order to describe the nature of U.S. intelligence and this Agency in general terms, and to provide a description of career opportunities which involve mathematics, physics and computer science.

Our resources and facilities for hosting such a visit are quite limited but we would be happy to make arrangements if you could provide us with a range of dates -- allow at least six weeks lead time, please -- and the projected number of students who would be coming. We do require that there be a faculty advisor or departmental professor accompanying the group, all of whom must be U.S. citizens. In addition we require some basic biographic data about each person -- full name, date and place of birth, current address and Social Security Number.

If you wish to initiate steps for this purpose, you may write to me at the following address:

Central Intelligence Agency
1016 Ames Building
Washington, D.C. 20505

Thank you for your interest and your patience.

Sincerely,

Coordinator for Academic Affairs

Dear Sir or Madam;

My name is Charisse E. Jeffries. I am the current president of Mau Alpha Tau, the Mathematics Club of Morgan State University in Baltimore, Maryland.

During the past few years, the Mathematics Club has lain dormant due to the lack of interested students. However last year, several students rejuvenated interest in the club. During the 1984-85 school calender year, I plan to fulfill the primary objective of the club: to familarize students with the importance of mathematics as it is related to science, engineering, computer science and other areas of knowledge.

Our club members and other students within the department of Mathematics and Computer Science are thristing for an exchange of mathematical knowledge and ideas as well as potential careers that encompass mathematics, physics, and/or computer science. I am personally asking for your help in aiding our club to fulfill this objective.

We are interested in visiting your facility and in sponsoring presentations, demonstrations, and speakers with information about your agency and career opportunities.

I am eagerly looking forward to your reply. I greatly appreciate your time and cooperation.

Sincerely,

Charisse E. Jeffries
